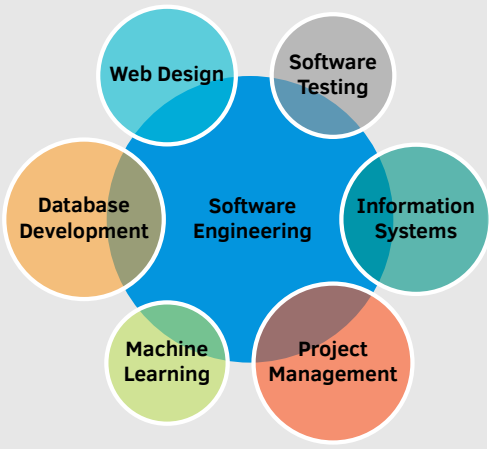
Technical Skills

Overview



Programming

$0\ LOC \longrightarrow 5000\ LOC$

C# • SQL

HTML • CSS • JavaScript

Java

Education

National Senior Certificate
Distinctions: English (First Additional) and Information Technology
Hoërskool Brandwag
2019 - 2023

BComp, Bachelor of Computing
Specialisation: Software Engineering
Belgium Campus ITversity
2024 - 2027

I'm an aspiring software engineer building mostly C#/.NET applications and websites, with experience leading team projects!

Experience

Jan 2025 - Feb 2025 **Temporary Teacher's Assistant** Benoni Junior

- Communicated effectively with students and staff, ensuring instructions and information were clear and understood.
- Supported classroom activities and collaborated with colleagues, strengthening teamwork and organizational skills.
- Assisted with minor technical issues, such as troubleshooting classroom projectors, demonstrating problem-solving.

Additional Training

13 May 2025 **A Glimpse into ERP** Belgium Campus ITversity

- Gained an understanding of enterprise resource planning systems, including core business processes, data integration, and workflow management.

5 June 2025 **GitHub Labs** Belgium Campus ITversity

- Learned version control best practices, collaborative development workflows, branching strategies, and repository management using GitHub.

16 July 2025 **Low-Code Development Masterclass** Belgium Campus ITversity

- Explored building applications with low-code platforms, focusing on rapid prototyping, automation, and visual development tools.

Personal Projects

Website Click to see

- Mystic Museum: A full-stack narrative website rebuilt with Node.js, Express, EJS, and MongoDB, featuring a server-side scavenger hunt that progressively unlocks content and visually degrades the UI.

C# Console App Click to see

- Evidence Locker: A cold-case management system in C/.NET 8 using a layered architecture. Implemented the repository pattern with generic and case-specific interfaces, backed by JSON-based data persistence. Modeled evidence chain-of-custody tracking and case reopening logic. Covered core logic with xUnit tests to validate CRUD operations and business rules.

C# Desktop App Click to see

- Belgium Agent Model: A NetLogo-style agent-based simulation app in C#/.NET 8 and WPF, built with a team of seven. Led the simulation engine team, structuring a multi-project MVVM solution. Built runtime Roslyn scripting so users can write custom agent behaviour, with live plots and monitors.
